ABSTRACT

This report presents educational data from a representative sample of United States public school systems. The sample included school systems with enrollments of 25,000 or more and a stratified sample of systems with fewer than 25,000 pupils. The primary purpose is to provide quantitative information comparable from school system to school system with summary and trend data analyses. The following subjects are covered: total money being spent in school systems, variance in per-pupil expenditures among different types of school systems, sources of school system funds, variations in receipt patterns among systems, and proportion of Federal funds received in different types of systems. Appendixes include sample design and selection, definitions and limitations of the data, and a reproduction of the survey report form. (JF)

FOREWORD

School systems across the Nation are experiencing increasing difficulty in finding the resources to keep pace with the rapidly rising cost of providing public elementary and secondary education. As a result there has been an increasing demand by decisionmakers for quantitative data on the financial status of the country's local public school systems. To meet this need, the National Center for Educational Statistics (NCES) is providing this comprehensive report on the finances of local public school systems for the school year 1967-68.

The report is part of NCES' continuing Elementary-Secondary General Information Survey (ELSEGIS) series, which was developed with the cooperation of the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers.

The present report contains summary tabulations and basic data tables giving quantitative financial data on the individual school systems in the sample, which included all school systems in the Nation with enrollments of 25,000 or more and a stratified sample (by enrollment size) of the systems with fewer than 25,000 pupils. A companion report providing an analysis of these data will be published in the near future. The ELSEGIS report *Statistics of Local Public School Systems: Schools, Pupils, and Staff, Fall 1968* was published earlier this year.

Thanks are due the CEDS representatives, other State research and statistical personnel, and local school officials whose joint cooperation resulted in a 99 percent response rate.

TEXT TABLES

A. Beginning balances and receipts, by enrollment size of school system, with source of revenue receipts: United States, 1967-68 4

B. Beginning balances and receipts, by metropolitan status and region, with source of revenue receipts: United States, 1967-68 5

C. Expenditures of local public school systems, by enrollment size of school system and expenditure account: United States, 1967-68 . . . 6

D. Expenditures of local public school systems, by metropolitan status, region, and expenditure account: United States, 1967-68 7

E. Current expenditures of local public school systems, by enrollment size of school system and expenditure account: United States, 1967-68 8

F. Current expenditures of local public school systems, by metropolitan status, region, and expenditure account: United States, 1967-68 . . 9

G. Current expenditures per pupil in average daily membership, by expenditure account, enrollment size of school system, metropolitan status, and region: United States, 1967-68 10

BASIC DATA TABLES

1. Beginning balances and receipts, by source, in selected local public school systems: School year 1967-68 12

2. Revenue receipts from Federal sources, by program, in selected local public school systems: School year 1967-68 46

3. Expenditures, by account, in selected local public school systems: School year 1967-68 80

4. Current expenditures, by account, in selected local public school systems: School year 1967-68 114

5. Current expenditures per pupil in average daily membership (ADM), by account, in selected local public school systems: School year 1967-68 148

INTRODUCTION

How much money is being spent for public elementary and secondary education? How is this money being spent? How much is expended per pupil? To what extent do the per-pupil expenditures vary among different types of school systems? From what sources do school systems receive funds? To what extent do the receipt patterns vary among different types of school systems? In different types of systems, what proportion of total revenues comes from Federal sources? These questions are being asked continously by educational planners, policymakers, administrators, and researchers.

This report on finances of local public school systems in the school year 1967-68, derived from a representative sample of the operating local public school systems in the United States, attempts to provide some of the answers. The report is part of the Elementary-Secondary General Information Survey (ELSEGIS) series, a cooperative survey system developed jointly by the National Center for Educational Statistics (NCES) of the U.S. Office of Education and the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers. A companion report containing a more detailed analysis of these data is planned for publication within a few months.

Summary data are presented in tables A-G. Quantitative information on individual school systems included in the sample is given in five basic data tables. Educational researchers and school officials have found such data useful not only for comparison purposes but also for making further analyses.

NCES staff, in consultation with a CEDS-ELSEGIS Advisory Committee, developed the survey instrument (appendix D). Preaddressed and coded forms for the local school systems included in the sample were mailed to research and statistics departments in each State education agency. States had the option either of providing the data from records already existing in their own files or of forwarding the form to the local school systems for completion. All but six States were able to compile the reports from their own records; the remaining six collected the data from the local school systems included in the sample.

To assure maximum comparability, the items and their definitions were designed to generally agree with the categories and terminology of U.S. Office of Education Handbook II--Financial Accounting for Local and State School Systems. The standard terminology manual was developed jointly by the U.S. Office of Education, State and local school administrators, and prominent educational organizations.[1]

Most of the data were collected between April and September of 1969. However, a rigorous machine editing program detected many serious reporting problems requiring extensive followup. Several States had to submit almost completely revised reports for their sample school systems. Most of these problems can be traced directly to the difficulty that some States had in converting data recorded in accordance with their own financial accounting system to our standard definitions which are derived from Handbook II. NCES staff are continously working with State education agency personnel to alleviate these difficulties. It should also be noted that this was the most comprehensive survey of the finances of local public school systems in a decade. In future surveys, the timespan between initial receipt of data and publication should be shortened considerably.

---

[1] American Association of School Administrators, Association of School Business Officials of the United States and Canada, Council of Chief State School Officers, Department of Rural Education, National Education Association, and National School Boards Association.

In the summary tables, the data are tabulated on the basis of three controls -- enrollment size, metropolitan status, and region, as follows:

a. Six enrollment size groups:

25,000 or more
10,000 - 24,999
5,000 - 9,999
2,500 - 4,999
300 - 2,499
Under 300

The enrollment figure used for stratification is actually the average daily membership (ADM) for the 1967-68 school year. This figure represents the average number of pupils on the official school rolls per school day in session. Thus in both the summary and basic data tables "enrollment size" actually refers to the number of pupils in ADM.

b. Three metropolitan status categories:

Metropolitan, central
Metropolitan, other
Nonmetropolitan

The metropolitan status categories agree, in general, with the criteria for "residence" used by the U.S. Bureau of the Census. A school system was defined as metropolitan if it was located in a county defined as a Standard Metropolitan Statistical Area (SMSA) county. (In New England, SMSA's were determined on the basis of towns rather than counties.) If the school system was coterminous with, or fell within the boundaries of a central city (the large city comprising the hub of the SMSA), it was classified "metropolitan, central"; if it fell within the SMSA but outside of the central city, it was classified "metropolitan, other."

Some large county-unit school systems included both the central city and surrounding areas. In such cases, a 50-percent rule was applied. Where the population of the central city (1960 Census) was 50 percent or more of the county population, the county-unit system was considered "metropolitan, central"; where the city population accounted for less than 50 percent, the system was categorized "metropolitan, other." For example, the Mobile County, Ala., school system was classified "metropolitan, central," because Mobile city made up 54 percent of the total county population, but the Dade County, Fla., system was placed in the "metropolitan, other," category because the central city of Miami accounted for only 31 percent of the total county population.

School systems located outside of SMSA's were classified "nonmetropolitan."

c. Four regions of the United States:

North Atlantic

- Connecticut
- Delaware
- District of Columbia
- Maine
- Maryland
- Massachusetts
- New Hampshire
- New Jersey
- New York
- Pennsylvania
- Rhode Island
- Vermont

Great Lakes and Plains

- Illinois
- Indiana
- Iowa
- Kansas
- Michigan
- Minnesota
- Missouri
- Nebraska
- North Dakota
- Ohio
- South Dakota
- Wisconsin

Southeast

- Alabama
- Arkansas
- Florida
- Georgia
- Kentucky
- Louisiana
- Mississippi
- North Carolina
- South Carolina
- Tennessee
- Virginia
- West Virginia

West and Southwest

- Alaska
- Arizona
- California
- Colorado
- Hawaii
- Idaho
- Montana
- Nevada
- New Mexico
- Oklahoma
- Oregon
- Texas
- Utah
- Washington
- Wyoming

The estimates shown in the summary tables are presented to the nearest thousand dollars. They are subject to both sampling and nonsampling errors. Sampling errors are covered in appendix A; other data limitations are discussed in appendix B.

APPENDIX A

SAMPLE DESIGN AND SELECTION

Sample Design

The ELSEGIS sample was designed to meet the following criteria:

1. Provide highly reliable national estimates.

2. Provide reasonably reliable estimates for each of the enrollment size strata.

3. Include all school systems with enrollments of 25,000 or more.

4. Include a stratum covering school systems with enrollments of under 300.

5. Limit the sample to approximately 1,400 school systems.

Expressing the requirements in practical terms, the variable "total enrollment,"[1] which was expected to be highly correlated with many other survey variables, was used as the critical measure. The number of sample school systems in any stratum was to be of sufficient size so that the relative error of the variable "total enrollment" for the stratum should not exceed 10 percent at the 95 percent confidence level.

After all the enrollment size group constraints listed above were satisfied, the remaining sample units were allocated among the strata in accordance with optimum allocation techniques. The sampling ratios and other data pertinent to the sampling plan are shown in table i. The sample was selected from the Office of Education's population of some 19,600 operating local public school systems, as of fall 1968. In most cases the pupil count was the average daily membership (ADM) for the school year 1967-68. The operating school systems were subdivided into the six strata. All systems of the first stratum (25,000 enrollment or more) were included in the survey. For each of the remaining strata, a systematic random sample was chosen from the specified sampling fractions (table i), after a random start.

Estimates

Estimates were obtained essentially by multiplying the reported figures by the inflation factor (the reciprocal of the sampling fraction), although the actual factors used reflected adjustments for nonresponse. For 35 school systems, the reported enrollment fell outside the limits of the stratum from which the system was selected. Such systems were inflated in accordance with the original inflation factor but listed and totaled in the correct stratum.

---

[1] The sample for the present survey, is the same as the one used for the ELSEGIS survey on schools and personnel, for which findings were released earlier this year in Statistics of Local Public School Systems: Schools, Pupils, and Staff, Fall 1968. "Total enrollment" was a variable in the earlier survey; "average daily membership," used in the present survey, is a closely related pupil measure.

Table i.--ELSEGIS universe and sample, 1967-68

Enrollment size stratum	Universe	Sample				Inflation factor	Respondents after strata changes
		Sampling fraction	Total	Respondents	Non-respondents		
Total U.S.	19,609	-	1,368	1,350	18	-	1,350
25,000 and over	168	1:1	168	168	0	1.00	168
10,000 - 24,999	516	1:2	257	250	7	2.06	248
5,000 - 9,999	1,068	1:5	213	211	2	5.06	214
2,500 - 4,999	1,944	1:8	243	240	3	8.10	236
300 - 2,499	8,046	1:30	268	266	2	30.25	270
Under 300	7,867	1:36	219	215	4	36.59	214

Sampling Error

Because the figures in this report are estimates derived from a sample, they are subject to sampling variability. Approximations of the relative standard error are given for selected variables in table ii. The chances are about 2 out of 3 that the difference due to sampling variability between an estimate and the figure that would have been obtained from a complete canvass of all school systems, using the same survey forms and instructions, is less than the standard error. Similarly, the chances are about 19 out of 20 that the difference is less than twice the standard error and 99 out of 100 that it is less than 2.5 times the standard error. An illustration of the use of table ii follows:

> The national estimate of revenue receipts from Federal sources is $2,312,460,000 (table A), the relative sampling error given in table ii is 1.6 percent or $36,999,000. In applying the probabilities described above, the chances are about 2 out of 3 that the figure from a complete count would be $2,312,460,000 ± $36,999,000 or between $2,275,461,000 and $2,349,459,000; about 19 out of 20 that it would be between $2,238,461,000 and $2,386,459,000; and about 99 out of 100 that it would fall within the range of $2,219,962,000 and $2,404,958,000.

The standard error does not reflect response biases or errors incurred in the data handling processes. However, concerted effort was made to minimize such errors through careful editing and followup procedures.

Educational researchers may wish to use the basic data tables to make additional analyses. Since the school systems represent a statistical probability sample, national totals can be obtained by multiplying the data by appropriate inflation factors.

The standard inflation factors for the six strata are given in table i. Because of stratum changes there are exceptions as follows:

School System	Stratum		Inflation factor
	in which listed	in which inflated	
Orange Unif., Calif.	1	2	2.06
Bridgeport, Conn.	1	2	2.06

Expenditures for instruction, total (E & F) . . .	.9	1.6	2.1	2.0	3.8	7.3	.5	1.3	2.2	1.7	1.8	1.4	1.0
Average daily membership (G).	.4	1.2	1.3	1.2	1.8	6.9	.5	1.1	1.9	1.4	1.8	1.4	1.5

1/ As presented in summary tables A to G; specific tables in which variable appears are shown in parentheses.

2/ Sampling errors are not shown for the 25,000-and-over enrollment stratum. Because the stratum was originally selected at certainty, the estimates are virtually without sampling error. A minimum amount of sampling error was caused by three school systems originally sampled at the rate of 1:2 which were included in this stratum because of increases in enrollment.

3/ Based on reports on ESEA Title I only.

APPENDIX B

EXPLANATIONS AND LIMITATIONS OF DATA

The data in this report are comparable from school system to school system to the extent that they are collected on a standard form based on standard definitions. However, despite the increasing use of Handbook II,[1] great variety in recording and accounting methods still prevails among the States and the local school systems. To assure maximum comparability the reports were rigorously edited. In instances of noncomparability, every effort was made to secure a revised, more compatible report. Serious discrepancies or gaps in the data are indicated by footnotes in the basic data tables.

Some important explanations and limitations, which apply to both the summary and the basic data tables, are given below:

General note -- Figures shown in the basic data tables were collected to the nearest hundred dollars. A blank in a data cell, therefore, does not necessarily mean an absolute zero. It may mean, rather, a receipt or expenditure of less than $50.

Balances on hand at beginning of year also referred to as beginning balances includes funds on hand from the school year 1966-67 that were available in the school year 1967-68 for current operations, capital outlay, and debt service. Some fiscally dependent systems do not carry balances because at the end of the fiscal year all money is reverted to the governmental unit of which the school system is a part. Balances do not necessarily indicate an excess of income over expenditures, because they usually are obligated for special purposes.

Revenue receipts are additions to assets which do not incur an obligation or represent exchanges of property for money. They include receipts from school taxes; appropriations from local, State, and Federal governments; tuition and transportation fees from patrons; and miscellaneous income which does not incur any obligation.

Revenue receipts from State sources do not include Federal funds distributed through the State education agency. Respondents were asked to include as State receipts school services which, in some States, do not go through the books of the local school system; e.g., State contributions to employee retirement and textbooks furnished by the State. In many instances, the value of such services were estimated.

Revenue receipts from Federal sources includes funds from Federal programs going to local school systems either directly or through the State as a distributing agency. Not included is the amount for Federal programs going to agencies other than the local public school system, e.g., that part of ESEA Title I dealing with programs for State operated or supported schools for the handicapped. For the most part, the receipts reported here are those recorded as receipts in the school system's regular accounting procedures. They are not official Office of Education or State education agency figures on allotments or distributions. Except where noted the Federal programs are administered by the Office of Education.

---

[1] Financial Accounting for Local and State School Systems, OE-22017.

ESEA Title I supports educational programs in areas having high concentrations of low-income families.

ESEA Title II provides school library resources, textbooks, and other instructional materials.

ESEA Title III establishes supplementary educational centers and services. Sometimes more than one school system shared in a Title III project. Where this occurred, Title III receipts were frequently reported only by the system receiving the funds.

NDEA Title III provides funds for the strengthening of instruction in critical subjects.

NDEA Title V-A promotes the establishment and maintenance of guidance, counseling, and testing programs.

Public Law 815 aids school systems in providing minimum school facilities in federally-impacted and disaster areas.

Public Law 874 provides operational aid to school systems on which Federal activities or major disasters have placed a financial burden.

Head Start provides special preprimary education to disadvantaged children. Formerly operated by the Office of Economic Opportunity, this program established by the Economic Opportunity Act is now administered by the Department of Health, Education, and Welfare. NOTE: The data in this survey include only the Head Start and Follow Through programs (see below) operated directly by the local public school system. Programs operated by the school system in behalf of another agency or by a nonschool agency are not included.

Follow Through provides extended enrichment programs for children who participated in Head Start or similar preschool programs. It was established by the Economic Opportunity Act and is administered by the Office of Education.

Vocational education includes receipts under the various Vocational Education Acts. In some cases, the distribution of vocational education funds by source (Federal vs. State receipts) was estimated.

National School Lunch and Special Milk Programs are administered by the U.S. Department of Agriculture. The data in this report include financial assistance only; they exclude the value of donated commodities.

Nonrevenue receipts come primarily from the sale of bonds to finance capital outlay projects. Also included are receipts from loans, sale of real property and equipment, and proceeds from insurance adjustments.

Incoming and outgoing transfers are shown in the basic data tables but excluded from the summary tables which were derived from the additions and inflations of the local school system figures. Because incoming transfers of a given school system were also reported as receipts by the transferring school system they would represent a duplication of total receipts at the national level. Similar duplication occurs on the expenditure side when the outgoing transfers of the transferring school system are also reported as expenditures by the receiving system.

Current expenditures are those required for the everyday operation of schools. In effect, they represent all expenditures other than those for capital outlay and debt service.

Current expenditures allocable to pupil costs are the seven accounts listed in the tables under this category which, because of their direct relationship to the education program, were recommended in Handbook II for use in the determination of current expenditures per pupil.

Food Services and Student Body Activities data were requested in terms of net expenditures. For food services this means gross expenditures less cafeteria sales; for student body activities it means gross expenditures less fees from athletic events or other activities for which admission was charged.

Payments into school housing authority, by principal and interest, are shown in basic data table 3 under debt services. States and school systems had difficulty distributing these payments into principal and interest, because the selling of bonds and payment of principal and interest was actually done by the authorities. In most cases these quasi-public institutions actually own the school property and the "debt service" payments made by the local school systems are technically rent payments which include, in effect, principal, interest, and authority overhead. Wherever possible, estimates of the distribution were obtained; where such a distribution was not feasible, the entire payment was placed in the column labeled "principal." In summary tables C and D, these payments have been combined with principal of debt and interest on debt in order to obtain better national estimates of these accounts.

For the reasons cited below, direct comparisons between individual school systems should be made with great caution:

1. The data were collected for general research purposes only. The State education agencies and the local school systems were urged to provide reasonable estimates where precise data were not available.

2. Basic statistics frequently do not tell the whole story. There are instances in which a school system will compare unfavorably with another in terms of statistical indicators when it is actually an equal or superior system. For example, school system X makes considerably higher expenditures per pupil than system Y. On the surface, system X is devoting more resources to education. Further investigation may indicate, however, that there may be reasons for the differences which are not directly related to educational output. For example, although having a generally lower pay scale than system Y, system X may have a much higher proportion of older teachers drawing salaries near the top of the scale, the higher salaries, in turn, will lead to higher teacher retirement payments. This may result then in a higher general level of expenditures without necessarily a higher general level of support for public education or a superior program.

APPENDIX C

RELATED DATA

In addition to this study, which is designed to collect data on individual school systems as well as to provide national estimates, NCES conducts three surveys from which national financial statistics are derived. In each of these three surveys, data are collected in the form of State aggregate reports. That is, educational research and statistics staffs in each State summarize local school system data and send NCES a composite report.

The survey *State Elementary and Secondary School Statistics*, taken biennially, covers comprehensive data on public school organization, staff, pupils, and finances. Preliminary data from the 1967-68 biennial survey are shown in *Preliminary Statistics of State School Systems, 1967-68*; the final publication is in preparation.

The survey *Fall Report on Membership, Teachers, and Schoolhousing*, conducted annually early in the school year, includes a supplemental section requesting estimates of four broad expenditure categories for the school year. *Fall 1967 Statistics of Public Schools* presents this information for the school year 1967-68.

Certification of Current Expenditures made by Local Education Agencies for Free Public Elementary and Secondary Education is an annual survey conducted to establish the average per pupil expenditure in a State as required for the administration of the Title I of Public Law 89-10 (Elementary and Secondary Education Act of 1965) and Title I of Public Law 81-874 (School Assistance in Federally Affected Areas). The most recent publication based on this survey is *Current Expenditures by Local Education Agencies for Free Public Elementary and Secondary Education, 1967-68.*

The biennial survey and the fall report include data on finances of intermediate administrative units and the State education agency; the current expenditure survey does not.

Because of differences in purpose, coverage, and method of data collection, estimates in the present publication will differ from figures for the same or similar variables presented in the other OE publications.

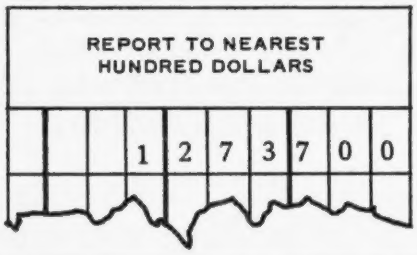
Instructions For Completing OE FORM 2350-1
ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY-I, PART B

GENERAL INSTRUCTIONS

Enter data in the applicable boxed areas, placing the entry to the far right and leaving any blank space on the left. **DO NOT LEAVE ANY LINE BLANK.** If there is no entry for a particular line, enter a zero (0) in the units position of the data field. If actual data are not available, please provide your best estimate of the entry for that variable, and enter "EST." in red in the margin of the form. In all cases report to the nearest **HUNDRED DOLLARS.** *(Note that the units and tens positions for each financial item entry are preprinted with 0's. If, for example, an amount comes to $1,273,678, enter 1,273,7).*

EXAMPLE:



REPORT TO NEAREST HUNDRED DOLLARS

			1	2	7	3	7	0	0

In order to achieve maximum comparability, certain entries which in some States do not go through the books of the local school system should nevertheless be included on both the "receipts" and the "expenditures" sides of the report. Two important examples are:

> TEXTBOOKS FURNISHED BY THE STATE. The value of such books should be reported in receipts under REVENUE FROM STATE SOURCES, item D, and in expenditures under OTHER INSTRUCTIONAL EXPENDITURES, item I.2.d.
>
> STATE CONTRIBUTION TO EMPLOYEE RETIREMENT. This amount should be reported in receipts under REVENUE FROM STATE SOURCES, item D, and in expenditures under FIXED CHARGES, item I.2.d.

NOTE: The definitions given here are, for the most part, condensations of those given in Handbook II *(Financial Accounting for Local and State School Systems).* Please refer to this manual in completing the form.

SPECIFIC INSTRUCTIONS

IDENTIFICATION DATA:

STATE CODE: Entered by the Office of Education

OE NUMBER: Entered by the Office of Education

REGION CODE: Entered by the Office of Education

STRATUM CODE: Entered by the Office of Education

SMSA CODE: Entered by the Office of Education

STATE SCHOOL DISTRICT IDENTIFICATION NUMBER: For optional use by State Education Agency

ITEM A. BALANCES ON HAND BEGINNING OF YEAR

Line 1. Enter the balance of all funds on hand from previous year which were available for the current operations of schools in the school year 1967-68, i.e., all those balances not earmarked for the special purposes listed in the instructions for line A.2.

Line 2. Enter the balances set aside for (a) new construction or modifications of physical plants and (b) retirement of principal and payment of interest on serial bonds.

ITEM B. REVENUE FROM LOCAL SOURCES *(Series 10-20)*

NOTE: The numbers in parenthesis after the line number refer to Handbook II codes.

Line 1. *(11)* Include taxes received from school district levies and taxes or appropriations received from local governmental units other than the school districts.

Line 2. *(12, 13)* Include tuition and transportation fees received from patrons.

Line 3. *(14)* Enter here other revenue receipts from local sources such as earnings from permanent funds, endowments, deposits, and investments; NET receipts from food services, student body, or other activities; rents, gifts, etc.

ITEM C. REVENUE FROM INTERMEDIATE SOURCES *(20).* Include funds collected by a subdivision between the local school district and the State *(e.g., county, supervisory union, etc.)* and distributed to school districts in amounts different from those collected within the districts.

ITEM D. REVENUE FROM STATE SOURCES. *(30).* Include here only those funds collected by the State and distributed to the districts. DO NOT include funds from the Federal Government that are distributed through the State agency. Include the value of textbooks provided by the State to the local school system and the State contribution to local school system employee retirement.

ITEM E. REVENUE FROM FEDERAL SOURCES, BY PROGRAM *(40).* Include here all funds received from the Federal Government either directly or through the State as a distributing agency.

This instruction is consistent with the revision to Handbook II made by the Office of Education — Committee on Educational Data Systems *(OE-CEDS)* School Finance Standing Committee. The change was transmitted to the State education agencies by a memorandum dated February 16, 1966. Essentially, this memorandum provided that the sections on REVENUE FROM STATE SOURCES and REVENUE FROM FEDERAL SOURCES *(pps. 15-17)* be reorganized as follows:

30. Revenue From State Sources
40. Revenue From Federal Sources
    40a. Federal Money Received Directly From the Federal Government
    40b. Federal Money Received through the State.

Line 1. Include receipts under ESEA Title I for the support of educational programs in areas having high concentrations of low-income families.

Line 2. Include receipts under ESEA Title II for school library resources, textbooks, and other instructional materials.

Line 3. Include receipts under ESEA Title III for supplementary educational centers and services.

Line 4. Include receipts under NDEA Title III to strengthen instruction in critical subjects.

Line 5. Include receipts under NDEA Title V-A for the establishment and maintenance of guidance, counseling, and testing programs.

Line 6. Include receipts under Public Law 815 to aid school districts in providing minimum school facilities in federally impacted and disaster areas.

Line 7. Include receipts under Public Law 874 for operational aid to school districts on which Federal activities or major disasters have placed a financial burden.

Line 8. Include receipts for Head Start programs operated directly by the school system. Do not include programs operated by the school system on behalf of another agency or by the other agency itself.

Line 9. Include receipts for Follow Through programs operated by the local school system.

Line 10. Include receipts received under the Federal Vocational Education Acts. Do not include State Vocational Education funds.

Line 11. Include funds received under the National School Lunch and Special Milk Programs. REPORT CASH PAYMENTS ONLY. DO NOT include the value of commodities.

Line 12. All other Federal Receipts — Include here any receipts not covered in lines 1-11 above.

ITEM F. TOTAL NONREVENUE RECEIPTS *(50-70).* Enter here receipts from the sale of bonds, loans, sale of real property and equipment, and proceeds from insurance adjustments.

ITEM G. INCOMING TRANSFERS *(80-90).* Enter here the total amount received from other school districts for tuition, transportation, or other services rendered.

ITEM I. CURRENT EXPENDITURES SCHOOL YEAR 1967-68. Report current expenditures made during the school year 1967-68 from all funds regardless of source of funds. The receipts for such expenditures may have come from local, State, or Federal sources. School systems which were not in operation in the school year 1967-68 *(including those which were nonoperating in the school year 1967-68 and those which were newly organized or reorganized in 1968-69)* will have no financial records for 1967-68. Such systems should report on the basis of budget estimates for the school year 1958-69.

Line 1. *(100 series).* Include expenditures for those activities which have as their purpose the general regulation, direction, and control of the affairs of the school district that are systemwide and NOT confined to one school, subject, or narrow phase of activity. Include salaries, contracted services, and other expenses for administration.

Line 2a. *(211-214).* Include salaries of professional instructional staff – teachers, principals, assistant principals, supervisors of instruction, guidance and psychological staff, librarians, and audiovisual staff.

Line 2b. *(215-216).* Include salaries of nonprofessional instructional staff – teacher aides, secretarial and clerical assistants, and any others who aid the professional instructional staff.

Line 2d. *(220-250).* Include expenditures for the textbooks furnished free to pupils, including the value of textbooks provided by the State, school libraries and audiovisual materials, teaching supplies, the net cost to the school system of rented books, and other expenses for instruction.

Line 3. *(300 series).* Include salaries and other expenses for those activities which have as their primary purpose the promotion and improvement of children's attendance at school.

Line 4. *(400 series).* Include salaries and other expenses for physical and mental health activities *(other than direct instruction),* i.e., medical, dental, psychiatric, and nurse's services.

Line 5. *(500 series).* Report salaries and other expenses for those activities which have as their purpose the conveyance of pupils to and from school activities, either between home and school or on trips for curricular or cocurricular activities, including: salaries of drivers, mechanics, etc.; contracted services or public carriers; replacement of vehicles; pupil transportation insurance; expenditures in lieu of transportation; and operation and maintenance of transportation equipment.

Line 6. *(600 series).* Include salaries and other expenditures concerned with keeping the school plant open and ready for use.

Line 7. *(700 series).* Include salaries and other expenditures for activities concerned with keeping the grounds, buildings, and equipment at their original condition of completeness or efficiency.

Line 8. *(800 series).* Report expenditures of a generally recurrent nature which are not readily allocable to other expenditure accounts, including: Employer contributions *(State or school system)* to employee retirement, insurance and judgements, rental of land and buildings *(EXCLUDING lease payments to authorities),* and interest on current loans.

Line 10. Report the NET expenditures, if any, of the food services operation, i.e., the gross expenditures, less the cafeteria sales. If the receipts from cafeteria sales equal or exceed expenditures, enter a zero on this line. Exclude the value of commodities donated by the U.S. Department of Agriculture.

Line 11. Report the NET expenditures, if any, for such extracurricular activities as interscholastic athletics, entertainment, publications, and clubs. If any receipts from such activities exceed expenditures, enter a zero on this line.

Line 12. Include expenditures for (a) services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc., (b) summer schools, i.e., schools in session between the end of the regular school term and the beginning of the next regular school term. Include expenditures for summer head start programs operated as part of the school system's program, (c) adult education programs, and (d) junior college programs *(grades 13 and 14)* operated by the local public school system.

ITEM J. CAPITAL OUTLAY *(1200 series)*

Line 1. *(1210-1220).* Include expenditures for the acquisition of sites, new buildings, and improvements to existing structures.

Line 2. *(1230).* Include expenditures for NEW items of equipment.

ITEM K. DEBT SERVICE FROM CURRENT FUNDS *(1300 series).* Record here only those expenditures paid from current funds.

Line 1. *(1310).* Enter the amount expended from current funds to retire serial bonds, short-term and long-term loans, warrants, or bills.

Line 2. *(1320).* Enter the amount from current funds expended for interest on bonds, and short-term and long-term loans.

Line 3. *(1330).* Enter the amount paid from current funds into sinking funds which are to be used at some future date to *retire term bonds.*

Line 4a. *(1340a).* Enter the amount paid for principal to schoolhousing authority or similar agency.

Line 4b. *(1340b).* Enter the amount paid for interest to schoolhousing authority or similar agency.

Line 5. *(1350).* Enter here expenditures for any expense incurred in connection with debt service not covered above. *(Exclude those connected with the sale of bonds).*

ITEM L. OUTGOING TRANSFERS *(1400 series).* Enter here those payments made to other school districts or administrative units for tuition and transportation.

ITEM N. ATTENDANCE AND MEMBERSHIP IN FULL-TIME ELEMENTARY-SECONDARY DAY SCHOOLS IN SCHOOL YEAR 1967-68. Report Average Daily Attendance *(ADA)* and Average Daily Membership *(ADM)* in full-time elementary and secondary day schools in accordance with the formulas given below; exclude students in summer schools, adult education, or junior colleges. Report to the nearest WHOLE NUMBER.

$$\text{ADA} = \frac{\text{Annual aggregate days attendance}}{\text{Actual number of days taught}}$$

$$\text{ADM} = \frac{\text{Annual aggregate days attendance plus annual days absence}}{\text{Actual number of days taught}}$$

A half-day nursery school or kindergarten should be counted as full-time for purposes of determining average daily attendance and average daily membership. For example, if 100 pupils attended nursery school in the morning and a different group of 100 pupils attend in the afternoon, the aggregate attendance for the day would be 200.

ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY
Of
Public Elementary-Secondary School Systems

ELSEGIS - I

PART B - FINANCES: SCHOOL YEAR 1967-68

INTRODUCTION

This report form is the second of two parts comprising the Elementary-Secondary General Information Survey *(ELSEGIS)* conducted by the U.S. Office of Education with the close cooperation of the Committee on Educational Data Systems *(CEDS)* of the Council of Chief State School Officers.

Part A on Schools, Pupils, and Staff for Fall 1968 was sent to you in December 1968. Reports have been received from most of the school systems in the sample. We again thank you for your cooperation.

Part B was designed primarily to meet the immediate needs of planners at the National level with particular emphasis on the impact of the various federal programs on local school system finances. However, it will also serve the broader informational needs of the educational community.

In its local school system survey program, the Office of Education strives for compatibility of data from school system to school system despite varying State and local accounting systems. To achieve this goal in the complex area of school finance, it is important that the enclosed instructions be carefully followed.
